

RMEF 100% Fully RoHS Compliant Lead-Free Thick Film Chip Resistors for Next Gen Applications

RALEIGH, NC (Feb. 8, 2022) – Surface mount resistors have complied with the EU's ROHS standards through exemption 7c-I. The exemption has been extended twice, but with an expiration date looming, many companies are seeking fully RoHS compliant parts. To help companies transition to 100% RoHS compliant, lead-free resistors, Stackpole offers its RMEF Series. Stackpole's RMEF is a general-purpose resistor series offering resistance values from 1 ohm to 10M, in 1% and 5% tolerances and TCR's ranging from 100 ppm to 400 ppm depending on size and resistance value. The RMEF is an ideal substitute for electronics that must transition to fully

lead-free components for compliance as it provides all the performance, resistance values, power and voltage ratings of a general-purpose chip resistor, in a completely lead-free package.

Pricing for the RMEF varies with size, value, and tolerance. Contact Stackpole or one of our franchised distributor partners for specific pricing.

RMEF Series

General Purpose Thick Film Chip Resistor 100% RoHS Compliant Without Exemption

For more information about Stackpole products, contact Stackpole Electronics, Inc. at 3110 Edwards Mill Road, Suite 207, Raleigh, NC 27612; phone 919-850-9500; email marketing@seielect.com; or visit the website at www.seielect.com.

Stackpole Electronics Inc. is a leading global manufacturer of resistors supplying to the world's largest OEMs, contract manufacturers and distributors. Headquartered in Raleigh, N.C., the privately held company began manufacturing in 1928 as part of Stackpole Carbon Company in St. Mary's, Pennsylvania. Now part of the Akahane Stackpole Manufacturing Group (ASMG), Stackpole has manufacturing facilities in Japan, Taiwan, China and Mexico; warehousing facilities in El Paso, Shenzhen and Japan; and international sales offices in Tokyo, Taipei, London, Hong Kong and Shenzhen.
